

Bra Size Measurements

Your bra size can change due to age, diet or exercise, and statistics show that 85% of women are wearing the wrong size bra. To determine your bra size follow the instructions shown here:

A. Band Measurement (underbust)

First measure around your body right under your breasts where the bra band sits. Pull the measuring tape snug but not tight (diagram A). Or measure from the middle of your chest to the center of your spine, under your remaining breast where the bra band sits. Double this figure. This is your 'underbust' or Band Measurement.

B. Cup Measurement (overbust)

Now measure around your body over the fullest part of your breasts (diagram B). Or measure from the middle of your chest to the center of your spine, over the fullest part of your remaining breast. Double this figure. This is your overbust measurement or Cup Measurement.

Example

Band measurement:

The measurement is 31", or $15\frac{1}{2}" \times 2 = 31"$ Band measurement is 31 inches.

Cup measurement:

The measurement is 37", or $18\frac{1}{2}" \times 2 = 37"$ Cup measurement is 37 inches.

Band measurement plus 4-5 inches = Bra size

Cup measurement minus Bra size = Cup size (0=A, 1=B, 2=C, 3=D, 4=DD, etc.)

$31" + 5" = 36"$ bra size; $37" - 36" = 1$ (B cup size) Bra Size is 36B.

Or use the chart below to simply determine your correct bra size based on your band and cup measurements. Remember this is only a guide. **Or call us at 800-525-2420 and give one of our fitters your band and cup measurements and we will help you determine your bra size.**
