# Resta™ Crème

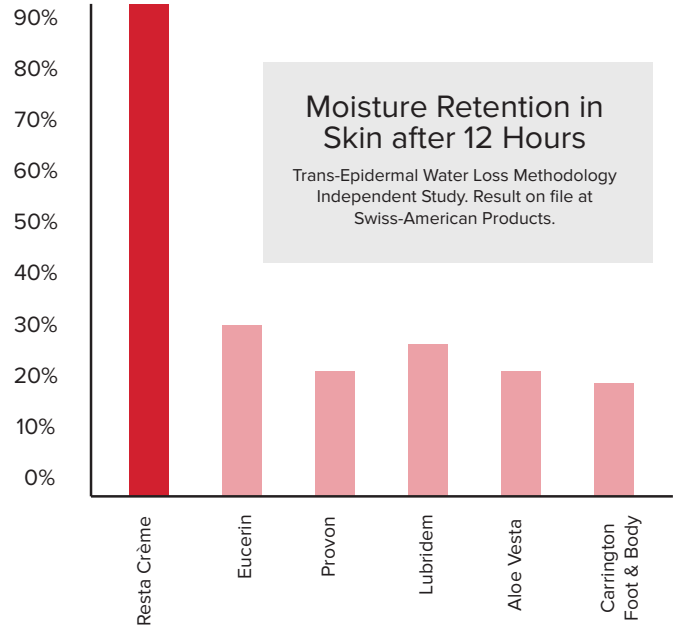

Resta Crème provides superior lubricating and moisturizing protection for your skin. It “melts” on contact, penetrating skin cell layers and holding moisture in for 12 hours at a time. Use twice a day to help “normalize” severe dry skin conditions such as diabetic dry skin. Will not irritate the most sensitive skin. Waterproof, fragrance-free, preservative-free, hypoallergenic, and non-comedogenic (will not clog pores). Formulation is compatible with all brands of elastic pressure garments.

## Resta Crème Features

- No sticky residue
- 12+ hour effectiveness
- Economical
- Sensitivity-free
- Melts on contact
- Quickly absorbed
- Deep penetration
- Will not affect garments
- Practical

## Great for moisturizing:

- Burns – 1st and 2nd degree burns as well as sunburns, grafts that have healed and donor sites, scar massage, under compression garments.
- Dry skin associated with diabetes – helps stop drying and cracking.
- Radiation oncology – helps relieve dryness associated with discomfort from radiation therapy.
- Wound care – lubricates skin, loosens non-viable tissue, and great for skin under zinc compression boots/compression therapy.

## Application:

Apply a small amount of Crème to the risk area at any time, but ideally apply after washing or hydrating and at bedtime to trap in maximum moisture. Apply twice daily, as needed, and allow Resta Crème to soak into skin.

# Resta™ SilverGel

Resta SilverGel, an Antimicrobial Skin and Wound Gel, releases silver as demanded by the bioburden of the wound. Tested to kill for at least three days. Resta SilverGel is completely clear, allowing clinical observation of the wound bed.

## Resta SilverGel accomplishes the following goals:

- Crystal clear, broad-spectrum antimicrobial protection
- Amorphous gel allows full antimicrobial contact with entire wound bed
- Sustained and effective silver ion release for at least 3 days – proven by comprehensive testing
- Remains clear while in use – will not discolor or stain tissue
- Non-cytotoxic
- Ideal viscosity – very easy to apply and remains in wound bed

## Use On:

- Pressure ulcers (Stage I-IV)
- Grafted wounds and donor sites
- Partial and full-thickness wounds
- Surgical wounds
- Leg ulcers
- Lacerations and abrasions
- Diabetic foot ulcers
- Chronic wounds
- 1st and 2nd degree burns
- Venous stasis ulcers

# Resta™ Wound Cleanser

Resta Wound Cleanser is “wetter than water” for fast, thorough and gentle cleansing of the wound without force. Gentle ingredients for no sensitivity, stinging or adverse effects on granulating tissue. Non-cytotoxic formula is dispensed via a trigger sprayer, delivering the optimum PSI for wound cleansing.

# Resta™ Lite

Resta Lite lotion is perfect for daily moisturizing of face, hands and body. Resta Lite is especially effective immediately after your shower or bath, using the unique Resta Crème base to provide a watertight moisture barrier that not only adds water to your skin but also seals in remaining surface moisture. This barrier substitutes for the skin's natural oil, delivering twice the long-term moisturizing properties of other leading brands. Resta Lite is safe for sensitive skin, non-comedogenic and fragrance-free.
